	ER-PLUMBING S	YSTEMS INSPECTION REPORT	CASE NO.	
	(MANUFAC	FURED HOME)		
NOTE TO INSPECTOR:	All inspections must be comp	leted following installation and set-up.		
LOCATION OF MANUFACTURED HOME			SERIAL NO. OF MANUFACTURED HOME	
NAME OF INSPECTOR		NAME AND ADDRESS OF FIRM		TELEPHONE NO.
1. CERTIFICATION OF W	ATER SYSTEM	ALL WATER PIPING HAS BEEN SUBJECTED TO A PRESSURE OF WATELOSS OF PRESSURE? YES NO	ER OR AIR AT 100 PSI F	OR 15 MINUTES WITHOUT
The drainage and vent syste	ems will be tested by one of t	he methods described below for evidence or indication of leakage.		
2A. AIR TEST — The fixture traps shall be filled with water and remaining openings securely plugged. The entire system shall be subjected to a 2 inch (manometer) water column air pressure test. If the system loses pressure, leaks may be located with smoke pumped into the system or with soap suds spread on the exterior of the piping.			NO LEAKS DETECTED OR EXISTING LEAKS REPAIRED?	
		on the exterior of the piping.		
		on the exterior of the pipmg.	YES NO	NOT APPLICABLE
water to the rim of the toile shall be sustained for not le	et bowl. (Tub and shower dra	shall be in a level position, and the entire system shall be filled with ins shall be plugged.) After all trapped air has been released, the test yidence of leaks. The waste piping above the level of the toilet bowl	NO LEAKS DETECTED REPAIRED?	OR EXISTING LEAKS
water to the rim of the toile shall be sustained for not le shall then be tested and sho	et bowl. (Tub and shower dra	shall be in a level position, and the entire system shall be filled with ins shall be plugged.) After all trapped air has been released, the test vidence of leaks. The waste piping above the level of the toilet bowl en the high fixtures are filled with water and emptied simultaneously	NO LEAKS DETECTED REPAIRED?	
water to the rim of the toile shall be sustained for not le shall then be tested and sho to obtain the maximum poses. FIXTURE TEST — The eaks and retarded flow while water to the top of the dam	et bowl. (Tub and shower dra ess than 15 minutes without e ow no evidence of leakage who ssible flow in the drain piping the plumbing fixtures shall be: tile they are being emptied. No	shall be in a level position, and the entire system shall be filled with ins shall be plugged.) After all trapped air has been released, the test vidence of leaks. The waste piping above the level of the toilet bowl en the high fixtures are filled with water and emptied simultaneously. Subjected to a flow test by filling them with water and checking for primetallic shower stalls shall be tested for leaks by filling the pan with all water heaters shall be equipped with approved and listed fully	NO LEAKS DETECTED REPAIRED?	OR EXISTING LEAKS
water to the rim of the toile shall be sustained for not le shall then be tested and sho to obtain the maximum posterior. FIXTURE TEST — The eaks and retarded flow while water to the top of the dam automatic valves or a single	et bowl. (Tub and shower dra ess than 15 minutes without e ow no evidence of leakage who ssible flow in the drain piping the plumbing fixtures shall be tile they are being emptied. No a for not less than 15 minutes valve design to provide temp	shall be in a level position, and the entire system shall be filled with ins shall be plugged.) After all trapped air has been released, the test vidence of leaks. The waste piping above the level of the toilet bowl en the high fixtures are filled with water and emptied simultaneously 3.	NO LEAKS DETECTED REPAIRED?	OR EXISTING LEAKS
water to the rim of the toile shall be sustained for not le shall then be tested and sho to obtain the maximum posts. B. FIXTURE TEST — The eaks and retarded flow white water to the top of the dame automatic valves or a single shall discharge by gravity with the property of the shall discharge by gravity with the property of the dame to the top of the dame to the dame	et bowl. (Tub and shower drass than 15 minutes without en or no evidence of leakage who said the drain piping the plumbing fixtures shall be alle they are being emptied. Not for not less than 15 minutes valve design to provide tempithout being trapped and shall acovide Severe Penal III	shall be in a level position, and the entire system shall be filled with ins shall be plugged.) After all trapped air has been released, the test vidence of leaks. The waste piping above the level of the toilet bowl en the high fixtures are filled with water and emptied simultaneously 3. subjected to a flow test by filling them with water and checking for primetallic shower stalls shall be tested for leaks by filling the pan with all water heaters shall be equipped with approved and listed fully erature and pressure relief. Full size drain lines shall be provided and	NO LEAKS DETECTED REPAIRED? YES NO FIXTURES FUNCTION YES NO	OOR EXISTING LEAKS NOT APPLICABLE SATISFACTORILY? VICE OR CONSPIRACY
water to the rim of the toile shall be sustained for not le shall then be tested and sho to obtain the maximum post. 3. FIXTURE TEST — The leaks and retarded flow white water to the top of the dame automatic valves or a single shall discharge by gravity with the shall discharge by	et bowl. (Tub and shower drass than 15 minutes without end to be not evidence of leakage who said the plumbing fixtures shall be they are being emptied. Not for not less than 15 minutes walve design to provide tempithout being trapped and shall acovide Severe Penaltilice The ISSUANCE OF AN	shall be in a level position, and the entire system shall be filled with ins shall be plugged.) After all trapped air has been released, the test vidence of leaks. The waste piping above the level of the toilet bowl en the high fixtures are filled with water and emptied simultaneously 3. subjected to a flow test by filling them with water and checking for ommetallic shower stalls shall be tested for leaks by filling the pan with All water heaters shall be equipped with approved and listed fully erature and pressure relief. Full size drain lines shall be provided and I not have the outlet threaded. ES FOR ANY FRAUD, INTENTIONAL MISREPRESENTATION OR C	NO LEAKS DETECTED REPAIRED?
